

MYTH

You should only use the star rating system when selecting a sunscreen.

FACT

The star rating does not communicate the amount of UVA protection that a product delivers.

It communicates only the ratio of UVA which is absorbed as compared to the amount of UVB that is absorbed.¹ It is best to select a sunscreen with high SPF as well as a high number of stars. All of the products in our SunSense™ range are broad spectrum sunscreens which protect against both UVA and UVB radiation and have a high SPF.

SunSense™ is the No.1 prescription sunscreen in the UK.²
Discover the range and buy online at [sunsense.co.uk](https://www.sunsense.co.uk)

AUSTRALIAN
MADE

Always read the label and use only as directed. Do not stay too long in the sun, even when using a sunscreen product. Keep babies and young children out of direct sunlight. Over-exposure to the sun is a serious health threat.
